

MECHANICUM KNIGHT MOIRAX WITH VOLKITE VEUGLAIRE AND GYGES SIEGE CLAW

Fitted with a potent reactor core capable of powering the most destructive weaponry available to its class, the Knight Moirax was a formidable tool in the arsenal of Questoris Households loyal to the Mechanicum. However, this energy core was notorious for radioactive instability, and so the Moirax chassis was considered to be an unseemly instrument with which to lay the foundations of the Imperium, seeing minimal use on human-occupied worlds before the darkest hours of the Horus Heresy.

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims. For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct the Mechanicum Knight Moirax with Volkite Veuglaire and Gyges Siege Claw. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can easily be filled with model filler or super glue. Any slight warpage of thin parts can be corrected by immersing the part in hot water for about 1 minute, then bending it back into shape.
